

9. Early years practice procedures

09.6 Sleep and rest time

We recognise that sleep and rest times are key times in the day for being close and promoting security and are an important part of a child's unique and individual care. Younger children will need to sleep but older children do not usually need to. No child is made to sleep. Our sleep and rest procedures comply with the EYFS and the latest available safety guidance.

Partnership with families

As part of a child's settling in we will ask about their usual sleep and rest preferences and routines. As far as possible we will follow their usual routine, however, children's routines may change once they are in the setting, and we will respond flexibly. Children's sleep and rest preferences are recorded, and parents/carers are informed of any significant changes to a child's sleep routine.

If a child is not ready to sleep, they are never forced to. If we feel a child is ready to sleep or it is their usual sleep time, we will settle a child to sleep and soothe them, if after 15 minutes they are not sleeping they will be encouraged to rest or go and play as appropriate. Under no circumstances is a child ever physically restrained whilst trying to settle them to sleep. We allow children to sleep for a cycle appropriate to their age and stage as this promotes their development and well-being needs.

Staff training

All staff are required to read Lullaby Trust Guidance on Safer Sleep and the NHS advice on Sudden Infant Death Syndrome.

The sleep environment

The manager ensures a risk assessment is completed for the sleep area to ensure that it is safe and meets the requirements set out in the EYFS and British Safety Standards. This is reviewed each time a change to the environment is made and at least annually. A daily check of this environment takes place before any children arrive.

An emergency plan is displayed, showing what action to take if a child stops breathing whilst asleep. There is a room thermometer in the sleep area that is checked when settling a child to sleep and the temperature recorded.

The sleeping environment must be:

- Be clean and uncluttered.
- There must be no shelves or objects above where the child is sleeping.

- The room temperature should be between 16–20C monitored by a thermometer in the sleep area. This must be recorded on the sleep checklist when children go to sleep
- The room should be well ventilated.
- Children aged over 12 months must be placed down on their back in their own separate sleep space on a clear, flat, firm surface such as a cot, bed or suitable mattress on the floor.
- Children must sleep head to toe to reduce the spread of infection.
- Every child has their own clean bedding, consisting of a fitted bottom sheet and cotton cellular blanket
- Every child has a place where their clothes and comforter are stored. This is labelled with a photo so they can identify their basket (if used).
- Pillows, cot bumpers and duvets, are not used

Supervision of sleeping children

- Children under six months of age will always have an adult with them in the same room for every sleep.
- A sleeping or resting child is always within sight and hearing of staff.
- Babies under six months old or a baby new to the setting, have an active sleep check made every five minutes, until staff are familiar with their routine.
- A ten-minute timer (or 5 minutes for babies under six months old) is used to remind staff to check sleeping children and carry out an active check on their well-being.
- Each active sleeping checks is recorded with the time, and date of the check and is signed by the staff member making the check.

Young children

- Young children sleep on rest mats and have their own personalised bedding.
- Young children each have a place to put their clothes and shoes in, and in which they keep any special toy, book, or comforter that they need for sleep.
- Nappies are changed and heavier clothing is removed.
- Hair accessories with parts that may come lose or detached and pose a choking hazard are removed before sleep/rest time.
- A separate area of the room is made as quiet as possible, perhaps with some soft music playing and curtains drawn.
- Young children are settled by their key person. They are soothed to sleep. Key persons may stroke or very gently pat children.

- Sleeping children are always supervised within sight and hearing of staff.
